bestofyear

Gensler

project Baltimore.

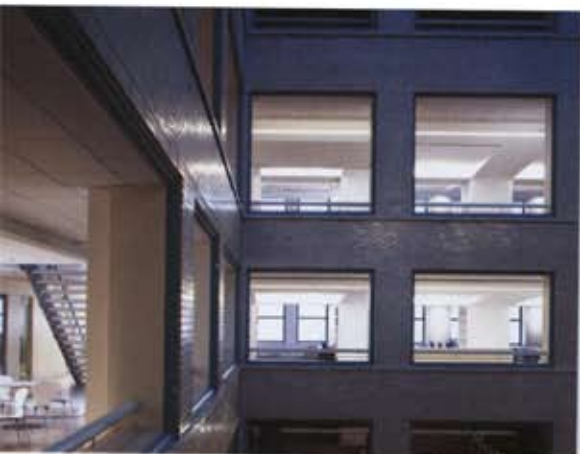

standout A steel bike rack outside and the reception area's feature wall of bicycle-cog scrap metal, backlit by LEDs, proclaim that these designers are cyclists and "recyclists."

Ippolito Fleitz Group

project Stuttgart, Germany.

standout Carpet plays a major role, with blue-and-gray plaid on the floor in reception and a jungle pattern cladding the studio's ceiling—from which pendant fixtures with unique ribbon pulls are suspended.

VOA Associates

project Chicago.

standout Surrounding the skylit atrium of D.H. Burnham and Company's Railway Exchange Building, this two-level LEED Silver interior features cork flooring, carpet with recycled content, and bamboo accents.
