Motel One Campus

[Restaurant]

For the headquarters of Motel One, a restaurant was realised with a design idiom that reflects the corporate identity of the hotel chain and still possesses an autonomous appearance. In the centre of the space hangs a canopy of pendant lamps that resemble Chinese lanterns. Different lampshades let light escape in horizontal lines, creating a warm ambience. These horizontal lines are reflected in the window shutters, which play with the height of the space. The rear brick wall brings the outdoors inside, making guests feel like they are sitting at a piazza table.
